

Neanderthal

Neanderthal (pípè /niː ˈændərtaːl/, /niː ˈændərθɔːl/), tabi /neɪ ˈændərtaːl/),^[1] bakanna kiko bi **Neandertal**,^[2] ni ikan ninu iran *Homo* to ti pare to wa nigba *Pleistocene specimens* ni Europe ati apaiwoorun ati arin Asia. Neanderthals je titopo boya bi *subspecies* (tabi *eya*) awon *eniyan* (*Homo sapiens neanderthalensis*) tabi bi *iru eda* otooto (*Homo neanderthalensis*).^[3] Awon *traits* Neanderthal-asiwaju akoko yo wa ni Europe ni bi odun 600,000–350,000 seyin.^[4] Loni (ni 2010) ifihan genetiki daba ibimopapo sele pelu *Homo sapiens* ni bi odun 80,000 to 50,000 seyin, won si ni gbagbo pe awon eniyan isun Eurasia je bi 1% de 4% Neanderthal.

Itokasi

- The pronunciation /niː ˈændərθɔːl/ is very common in the United States and is often listed first in US dictionaries, for example *American Heritage Dictionary* and *Random House Dictionaries* (<http://dictionary.reference.com/browse/Neanderthal?r=66>). The UK pronunciation is /niː ˈændərtaːl/, as shown in *Cambridge Advanced Learner's Dictionary* (<http://dictionary.cambridge.org/define.asp?dict=CALD&key=53135&ph=on>), and *Oxford Advanced Learner's Dictionary* (http://www.oup.com/oald-bin/web_getald7index1a.pl?nav=on&which_entry=024672%23x1%23x1%23Neanderthal&selected_word=Neanderthal&).
- Neandertal* is a widespread alternative spelling in English (see also US dictionaries in previous footnote) becoming so common that it is sometimes now listed first in dictionaries, for example *MSN Encarta* (<http://encarta.msn.com/encnet/features/dictionary/DictionaryResults.aspx?refid=561505630>). Archived (<http://www.webcitation.org/5kx5nTekZ>) 2009-11-01.
